## WORK EXPERIENCE

### Two Point One

Delhi, India

Software Developer

June 2021-Present

- Devised more than 20 visual elements for web applications, including graphics and layouts, by effectively converting UI/UX design wireframes into code using React and ensuring the high quality of the produced markup.
- Implemented a share link feature using React, which resulted in a 70% improvement in user invites and a notable increase in new user onboarding on the app, as measured by amplitude metrics.
- Developed and implemented new features with comprehensive testing, resulting in a 15% decrease in customer complaints as a direct result of the improved quality and reliability of the product.
- Created and implemented more than 15 UI pages using Webflow, efficiently managed content using the Webflow CMS, and developed at least 4 custom features not readily available in Webflow, demonstrating expertise in utilizing the platform and creating unique functionality.
- Built and implemented at least 10 custom email templates in SendGrid using HTML and CSS, demonstrating proficiency in creating visually appealing and functional email templates using these technologies.
- Participated in a highly collaborative agile team environment, collaborated with senior developers to acquire best practices in web development, and provided training to at least 3 colleagues on the use of Webflow, demonstrating a strong ability to work in a team and share knowledge.

### Tiniyo Pvt. Ltd.

Bengaluru, India

Software Engineer Intern

Jan 2021- March 2021

- Regularly maintained and updated the official website, as well as updated the documentation of the company services at least on a monthly basis, ensuring the accuracy and relevance of the information provided.
- Created and deployed a one-time password verification web application using Node.js, to showcase the functionality of the company's SDK service and demonstrate its capabilities to potential clients.
- Worked in a team to design, develop and implement a RESTful API using Node.js, MySQL, and JWT for an incident management web application, showcasing expertise in building scalable and secure web applications using these technologies.

## PERSONAL PROJECTS

### PORTFOLIO

[View](#)

- As a front-end developer, my portfolio showcases various web projects demonstrating my skills in HTML, CSS, Javascript, and other front-end libraries and frameworks. These projects range from simple static websites to interactive web applications and highlight my ability to create engaging and user-friendly experiences.

### ROCK PAPER AND SCISSORS GAME

[View](#)

- One of my recent projects was a rock, paper, scissors game built using React and SASS. This project required me to utilize my skills in frontend development, as well as my ability to think creatively and problem-solve. The game features a responsive design, allowing it to be played on any device, and includes a simple yet visually appealing interface.

## SKILLS & INTERESTS

**Skills:** HTML, CSS, Bootstrap, MaterialUI, Ant-designs, Styled Components, JQuery, React.js, Redux/Redux-Saga, SASS/LESS, Next.js, Storybook

## EDUCATION

Lovely Professional University

Jalandhar, Punjab

Bachelor of Computer Application(Hons.)

Jan 2021
