WORK EXPERIENCE

Two Point One   **New Hyde Park, NY**
Software Developer   *June 2021-Feb 2023*

- Implemented reusable front-end abstractions with React, improving application performance by 30% and codebase maintainability.
- Developed a share link feature with React, resulting in a 70% increase in user invites and improved onboarding.
- Improved product quality and reliability with comprehensive testing, reducing customer complaints by 15%.
- Created more than 15 UI pages using Webflow, efficiently managed content using the Webflow CMS, and developed at least 4 custom features not readily available in Webflow, demonstrating expertise in utilizing the platform and creating unique functionality.
- Collaborated in an agile team, acquired best practices in web development, provided training, and wrote structured code for a more maintainable codebase.

Tiniyo Pvt. Ltd.   **Bengaluru, India**
Software Engineer Intern   *Jan 2021- March 2021*

- Regularly maintained and updated the official website, as well as updated the documentation of the company services at least monthly, ensuring the accuracy and relevance of the information provided.
- Created and deployed a one-time password verification web application using Node.js, resulting in a 30% increase in potential clients signing up for the company's SDK service after showcasing its capabilities using this web application.
- Worked in a team to design, develop and implement a RESTful API using Node.js, MySQL, and JWT for an incident management web application, resulting in a 50% reduction in response time for incident management, showcasing expertise in building scalable and secure web applications using these technologies.

PERSONAL PROJECTS

PORTFOLIO   [View](#)

- As a front-end developer, my portfolio showcases various web projects demonstrating my skills in HTML, CSS, Javascript, and other front-end libraries and frameworks. These projects range from simple static websites to interactive web applications and highlight my ability to create engaging and user-friendly experiences.

ROCK PAPER AND SCISSORS GAME   [View](#)

- One of my recent projects was a rock, paper, scissors game built using React and SASS. This project required me to utilize my skills in frontend development, as well as my ability to think creatively and problem-solve.

WINDBNB   [View](#)

- Developed Windbnb, a vacation rental app using React, Zustand, and Sass, applying clean code principles, responsive design, and Zustand for state management to provide a maintainable, readable, and user-friendly app.
